Re: Ms. B. [name redacted for public archive]

[name redacted for public archive],

I have been providing psychological service to Ms. B. [name redacted for public archive] for a decade. She is definitely of good character and stable mental health. I do believe that she would benefit from the HSCADA assessment. Ms. B. [name redacted for public archive] believes that she has been targeted for years. She is certain that she has implants, and an assessment would be very beneficial.

Thank you for your consideration in this matter.

Yours truly,
